HEAD OF IMPLEMENTATION | HEALTHCARE TECHNOLOGY

Enterprise Implementation Leadership | Implementation Methodology | Portfolio & Team Leadership | Healthcare Integration

PROFESSIONAL PROFILE

Healthcare technology and implementation leader with 15+ years of experience delivering and scaling enterprise implementations across complex hospital and health system environments. Led more than 40 healthcare technology engagements across Australia, North America and Europe, with responsibility for implementation strategy, portfolio delivery, team leadership and customer outcomes.

Experienced across the full implementation lifecycle, from early discovery and scope confirmation through configuration, integration, testing, go-live and stabilisation. Comfortable working across clinical, operational, application and technical teams, particularly where workflows, interfaces and system dependencies need to come together for a successful deployment.

Known for bringing structure to complex delivery environments, identifying dependencies before they become blockers and building repeatable implementation approaches that teams can use as delivery scales.

CORE CAPABILITIES

Implementation Leadership

Enterprise Healthcare Implementation | Multi-Site Deployment | Full Deployment Lifecycle | Implementation Methodology | Technical Readiness | Cutover, Go-Live and Stabilisation

Portfolio and People Leadership

Deployment Portfolio Management | Resource & Capacity Planning | Delivery Sequencing | Implementation Metrics & Delivery Performance | Implementation Team Leadership | Performance Management | Coaching & Development

Governance & Cross-Functional Leadership

Executive Governance | Risk & Dependency Management | Executive Reporting | Clinical, Operational & IT Stakeholders | Product & Engineering Partnership | Implementation vs Product Scope Judgement

Healthcare Technology and Integration

Oracle Health Millennium | EHR / EMR | Patient Administration Systems | SAP S/4HANA | Oracle PeopleSoft | HL7 | Rhapsody | Clinical Workflow and Integration

SELECTED CAREER IMPACT

40+ Enterprise Healthcare Technology & Transformation Engagements

Led more than 40 healthcare technology and transformation engagements across Australia and international markets, progressing from hands-on implementation through solution architecture, consulting leadership, people management and portfolio governance

Up to 7 Concurrent Enterprise Engagements

Managed portfolios of up to seven concurrent enterprise engagements, balancing staffing, capacity, sequencing, technical dependencies, risk and customer commitments

Global Implementation Capability | 10+ Countries

Built reusable implementation methods, standards and knowledge resources that enabled Solution Consultants across 10+ countries to independently deliver increasingly complex customer engagements

30+ US Healthcare Organisations | Deployment Timeline Reduced from 12–24 Months to ~4 Months

Led a 30+ person multidisciplinary team and built a repeatable implementation model for a regulation-driven healthcare program delivered across 30+ US healthcare organisations

16+ Hours Removed per Implementation Site

Championed implementation automation that reduced manual configuration and validation effort by more than 16 hours per site

First-of-Kind Integration | 3,000+ Hours | \$1M+ Expansion Pathway

Led Australia's first Oracle Health–SAP integrated surgical inventory implementation, generating 3,000+ consulting hours, and later led a \$200K Queensland Health PoC supporting potential \$1M+ expansion across 16 HHSs

PROFESSIONAL EXPERIENCE

DIGITAL HEALTH COLLABORATION | 2026–PRESENT

Collaborative initiative with Women in Digital Health Leadership Program alumni.

- Contribute to problem definition, stakeholder-needs analysis and option assessment for a Primary Health Network workforce platform intended to improve access to education, tools and digital-literacy support

ORACLE CORPORATION (FORMERLY CERNER CORPORATION) | 2011–2025

Global enterprise healthcare technology organisation delivering digital health, interoperability and transformation solutions.

Senior Consulting Manager / Technical Consulting Manager | 2021–2025

Led enterprise healthcare implementation and consulting delivery across complex customer programs, with accountability for portfolio, people, governance and delivery outcomes.

- Owned complex enterprise healthcare implementations from discovery and scope confirmation through workflow and solution design, configuration, integration, testing, implementation readiness, cutover, go-live, stabilisation and optimisation
- Managed portfolios of up to seven concurrent enterprise engagements, balancing staffing, capacity, sequencing, technical dependencies, risk and customer commitments
- Managed up to 10 direct reports and led multidisciplinary teams of 20+, developing consultants toward increasingly independent ownership of complex customer engagements
- Established governance, readiness, executive reporting and escalation mechanisms to confirm scope, dependencies and accountabilities before they affected customer milestones
- Partnered with Product and Engineering to distinguish genuine product gaps from workflow, configuration, integration and deployment issues, providing structured implementation evidence to support decision-making
- Led resolution of technical dependencies across EHR, PAS, ERP, integration engines and third-party systems, establishing root cause across workflow, configuration, interface and data issues
- Led global implementation capability across Perioperative and Clinical Inventory, supporting consultants across 10+ countries with reusable implementation methods, standards and specialist guidance
- Identified a recurring implementation bottleneck, developed the automation concept, secured approval and championed delivery, reducing manual configuration and validation effort by more than 16 hours per site
- Led an executive-sponsored \$200K Queensland Health proof of concept integrating Oracle Health Millennium and SAP S/4HANA, aligning clinical, operational and technical stakeholders and positioning potential expansion across 16 Hospital and Health Services with an estimated \$1M+ consulting opportunity
- Delivered an accelerated 16-week perioperative and surgical scheduling implementation, achieving go-live with zero defects in my solution area

Consulting Manager / Senior Consultant | 2016–2021

Led international healthcare transformation, integration and regulation-driven deployment initiatives across Australia, Canada, Europe and the United States.

- Led complex implementation workstreams spanning discovery, workflow design, requirements, configuration, integration, testing, UAT, deployment readiness, go-live and optimisation
- Coordinated customer, consulting, vendor and technical teams across integrated clinical applications, patient administration, ERP, inventory, procurement, finance and third-party environments
- Facilitated clinical, operational and technical discovery and design sessions, translating real-world healthcare workflows into practical solution, interface and implementation requirements
- Worked directly with customer IT and interface teams on interface requirements, data mapping, XML and HL7 message review, integration testing, defect triage and implementation readiness
- Led a multidisciplinary team of 30+ professionals supporting a regulation-driven healthcare solution program across 30+ US healthcare organisations, building a repeatable model that reduced typical deployment timelines from approximately 12–24 months to four months while maintaining quality, compliance and mandated deadlines
- Led strategy, stakeholder alignment and delivery for Australia's first Oracle Health–SAP integrated surgical inventory implementation, coordinating clinical workflow, application, ERP, interface, testing and operational dependencies through production deployment and generating more than 3,000 contracted consulting hours
- Designed integrated GS1 and UDI-enabled implant traceability workflows connecting point-of-care activity, enterprise data and regulatory requirements, reducing recall investigation from up to 72 hours to near real-time

Solution Architect / Team Lead / Senior Delivery Consultant / Delivery Consultant | 2011–2016

Progressed through hands-on healthcare implementation, senior consulting, solution architecture and team leadership roles across enterprise healthcare programs in North America, Europe and the Caribbean.

- Led healthcare implementations from workflow discovery and solution design through configuration, integration, testing, deployment, go-live and post-implementation optimisation
- Translated complex clinical and operational workflows into application, interface and implementation requirements across perioperative, surgical scheduling, anaesthesia and clinical inventory environments
- Coordinated application, customer IT, integration and third-party teams to identify dependencies and resolve workflow, configuration and technical delivery issues
- Investigated application configuration, database relationships, data extracts and HL7 messages to support testing, integration troubleshooting and deployment readiness
- Co-developed implementation methodology and configuration-quality standards adopted across the global consulting practice and recognised through an internal innovation award

EARLIER EXPERIENCE

LESAFFRE YEAST CORPORATION**Account Manager / Administrative Assistant | 2006–2011**

- Progressed from administrative support into account management within an international organisation, managing customer requirements across sales, operations, logistics and finance. Worked extensively with Oracle PeopleSoft ERP and supported Salesforce CRM implementation, testing, documentation, training and adoption

EDUCATION & CREDENTIALS

Certified Health Informatician Australasia (CHIA) | Australasian Institute of Digital Health

Women in Digital Health Leadership Program – Graduate | Australasian Institute of Digital Health | 2026 Cohort

Master of Science – Management Information Systems | University of Wisconsin–Milwaukee

Bachelor of Business Administration – Marketing & International Business | University of Wisconsin–Milwaukee

TECHNOLOGY & DELIVERY KNOWLEDGE

Healthcare & Integration Technology

Oracle Health Millennium / Cerner Millennium | EHR / EMR | PAS | Perioperative | Surgical Scheduling | Clinical Inventory | SAP S/4HANA | Oracle PeopleSoft | HL7 | XML | Rhapsody Integration Engine | EDI

Technical Delivery

Technical Readiness | Interface Requirements & Mapping | Integration Testing | Data Validation | Ad Hoc SQL for Extraction, Validation & Audits | Root-Cause Analysis | Testing & UAT | Cutover, Go-Live & Stabilisation

Delivery & Collaboration

Jira | Azure DevOps | Confluence | Microsoft 365 | Agile | Waterfall | Hybrid Delivery
